Hidden Indicia Encoded in Varnish
are Revealed with a Decoding Lens

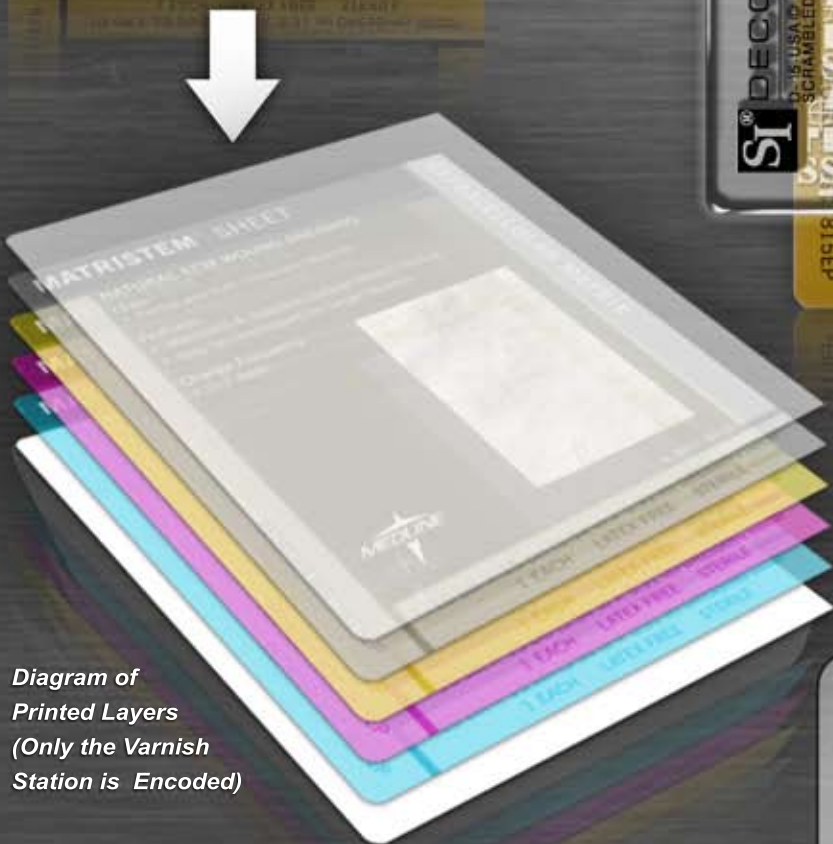

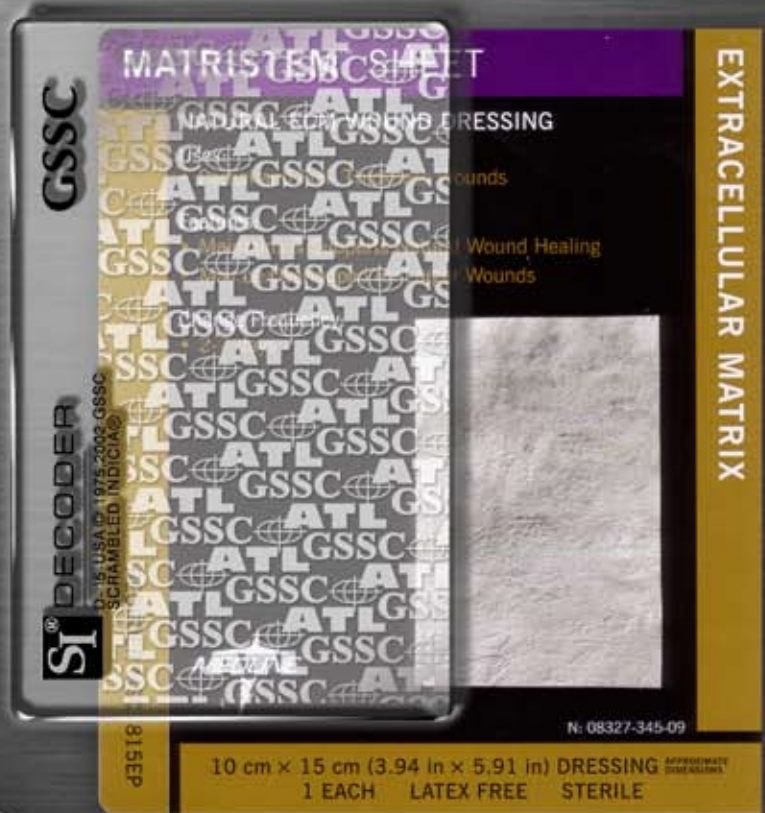

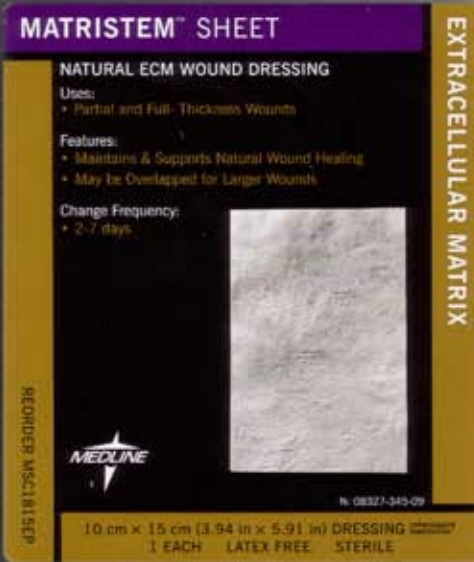

Diagram of
Printed Layers
(Only the Varnish
Station is Encoded)

- Layer 6: Encoded Varnish
- Layer 5: Black
- Layer 4: Yellow
- Layer 3: Magenta
- Layer 2: Cyan
- Layer 1: Base Substrate

-FEATURES-

- Easily incorporated into any design and doesn't effect the appearance of existing artwork.
- Highly resistant to copying and scanning.
- Can be easily decoded with and optical lens, proprietary software or and iDetector Mobile Authentication Device.
- Cost effective due to ease of integration into any varnish station.
