Wisconsin Medical Device Manufacturer Exhibiting at BIOMEDevice/Design & Manufacturing New England Show

Menomonee Falls, WI – Disposable die cut components, custom labels, and packaging capabilities will be the focus at the BIOMEDevice/Design & Manufacturing New England show, May 6-7, in Boston, MA.

"We look forward to exhibiting at this event," said Mike O'Connell, new business development manager for ATL's Medical Division. "It provides great opportunities for medical designers to learn about the benefits of partnering with a quality-driven company like ATL."

"After achieving ISO 13485:2003 registration over a year ago, ATL is recognized as a contract manufacturer specializing in disposable medical device converting and label printing following strict cGMP and FDA requirements," said O'Connell. "It's our commitment to our quality management system that sets ATL apart from other medical device converters and label manufacturers."

"Our current and future customers can be assured that in every phase of production, ATL will strive to achieve the highest quality standards possible."

Aside from ATL's ISO [13485:2003 registration](#), O'Connell also expects to showcase ATL's expertise in:

- [Island placement](#)
- Custom GHS label constructions
- [In-line cold seal pouching](#)
- [Track and trace and security label technologies](#)

"From past experience, we also know that show attendees are especially interested in our status as a cGMP compliant supplier," he said.

Additional ATL specialties, such as [multi-panel booklet labels](#), [product identification labels](#), and other [medical die cutting](#) and converting capabilities will be showcased in Boston.

Visit ATL at the show at Booth 211. Or [contact the company](#) to learn more about its capabilities in [custom flexographic label printing](#) and [disposable medical devices](#).
